PROJECT VALUE

\$ 1,023,744

Scope of Services

Design/Build Wet Lab – R.H. White was selected to upgrade an existing wet lab with a new Wafer Processing System (WPS) as well as a new pH Neutralization system.

*Due to proprietary nature of the lab all photos are AI generated.

Project Notes

- + **Efficient Demolition.**
Remove and dispose of existing wafer processing equipment, lab equipment, and the associated drain and neutralization system.
- + **Engineering and Design.**
Provide design, engineering and installation of new controls for leak detection alarm systems.
- + **Mechanical Systems Installation.** Install a dedicated fire suppression system for the new space and equipment.
- + **Live Business Environment.**
The live manufacturing environment necessitated stringent safety protocols, robust communication, and close coordination with facility operations.
